The data provided of which has been obtained and collated from a number of sources including planning records, telephone research with operating companies, industry journals, company and industry websites and existing BDS databases, built up over more than 20 years.

CONTENTS

1 EXECUTIVE SUMMARY	4
2 REPORT OVERVIEW	7
2.1 Background & Purpose	7
2.2 BDS Market Intelligence	8
3 MARKET CLARITY & POSITIONING	9
3.1 Material, Types & Definitions	9
3.2 Influencing Factors	9
Environment	10
Economy	10
Political Position	10
4 MARKET ANALYSIS	11
4.1 Sand & Gravel (Land Won)	12
4.2 Sand & Gravel (Marine Won)	16
4.3 Crushed Rock	18
4.4 Key Suppliers & Market Share	22
5 PLANNING ACTIVITY – TRENDS AND ANALYSIS	25
5.1 Consented Schemes	25
Consents vs Average	25
Consents vs Tonnage	26
Market Share vs Tonnage	26
Consents vs Time	27
5.2 Market Locality & Geographical Accessibility	28
6 FUTURE INDUSTRY PROSPECTS & DEVELOPMENT OPPORTUNITIES	30
6.1 Industry View & Forward Thinking	30
6.2 Aggregates substitution	32
6.3 UK Market, Economy & Future Planning	32

SAMPLE

1 EXECUTIVE SUMMARY

There is very limited published information available on the level of aggregates replenishment for the aggregates industry in Great Britain. This is primarily due to the difficulty in tracking planning activity and effectively relating that to industry consumption. BDS is in the unique the position of having carried out both activities for nearly 30 years and continues to do so moving forward. The '2021 Analysis of Aggregates Replenishment in Great Britain - 2022 (BDS 4th edition)' provides a review and analysis on the state of aggregates replenishment rates for the last eight years in Great Britain.

Aggregates are used across a broad spectrum of construction markets and the growth within the industry is dependent upon the supply of aggregate meeting demand. Pressure for aggregates continues to increase annually across Great Britain and to meet demand there remains the need for adequate quantities of aggregates from all sources, including primary (land-won and marine), recycled and secondary. Essential to this is the replenishment of Sand & Gravel and Crushed Rock primary reserves through the planning process, to replace depleting aggregate supplies.
