## 1 REPORT OVERVIEW

This report has been published annually for over 20 years and provide estimates of outputs and market shares by individual concrete building block plants and companies in Great Britain. It is part of a suite of reports covering products in the heavy building materials sector published by BDS on an annual or bi-annual basis.

Sources of information include primary telephone research with each company, interviews with industry contacts, planning documents, company reports and newsletters, trade journals, news feeds and others. We have always had a good response from the industry when discussing our draft figures, which is much appreciated. Whilst a majority of companies contribute, we respect others that do not wish to participate.

Any company acquisitions made since the last annual report up to the time of writing (December 2021) have been included under the new ownership for the whole of 2020. Our national figures may vary slightly from information published by other bodies or individual companies on market shares or volumes. This is more likely to be due to the different treatment of partly owned businesses and by a different definition of 'the market'.

The tables presented at the end the report reflect sites that were operational for some or all of 2020. Sites which BDS know to have opened since then are commented in the report and will feature in the data tables next year.

### 1.1. Background & Purpose

The purpose of the report is to provide a detailed view of the performance of concrete block paving companies in Great Britain. It provides information to individual plant level summarised by company, county, region and nationally and is designed to provide companies with market intelligence to support them in their operational and strategic objectives.

### 1.2. BDS Market Intelligence
