## 1. EXECUTIVE SUMMARY

The 1<sup>st</sup> edition of the Stormwater Management – Directory & Industry Market Assessment for Great Britain was produced by BDS to provide a greater understanding of the Stormwater Market within Great Britain. The report identifying key companies serving the market, products on offer and how Stormwater Management technologies, including SUDS, can support both the urban environment and the construction industry.

BDS is a marketing research consultancy excelling in providing current and greater understanding of the construction and waste markets and associated materials including aggregates, concrete, waste and asphalt. It is for this reason BDS is well placed to report on this industry market for Great Britain.

The report provides historical trends, current structure and future prospects for the Stormwater Management market, information on producing companies, commentary on routes to market, sustainability and challenges associated with using Stormwater Management techniques and technologies and considers the impact and relevance of managing stormwater within the urban environment.
